

Residential Non-Standard Metering Program

The Residential Non-Standard Metering Program allows Missouri residential customers to elect a non-communicating digital electric meter (Non-Standard Meter) in place of a standard Advanced Metering Infrastructure (AMI) meter (Standard Meter). Under this program, Evergy ("Company") will replace the existing meter with a Non-Standard Meter, and electric usage will be obtained through manual meter reads performed by Evergy or its authorized representatives.

Customers who participate in this program will no longer receive certain benefits associated with AMI service, including automated meter readings and access to enhanced energy usage information.

Participation in the program includes a one-time, non-refundable setup charge of \$125, payable in advance by check or money order, along with a recurring monthly charge of \$15, which will be applied to the customer's account, in addition to the standard residential electric service rate, taxes, surcharges and fees (as applicable).

As a condition of participation, customers must provide safe and reasonable access to the meter for installation and ongoing meter reading performed by Evergy or its authorized representatives. Tampering with the meter is strictly prohibited.

Release and Acknowledgement

By signing below, you acknowledge that you have read and understand the terms of the Residential Non-Standard Metering Program, including the applicable charges, requirements, and limitations. You agree to the installation of a non-standard digital meter at the service address listed and understand the associated impacts to service. You further agree to release and hold harmless the Company and its authorized contractors from any claims, damages, or liabilities arising from or related to your decision to opt out of Advanced Metering Infrastructure (AMI) service and participate in this program.
