

Curtailment and Payment Participation Details

» Curtailment Event Details

At the beginning of each week, Evergy communicates about that week's demand for power based on current and historical peaks throughout the connected system. We make a judgement call that day as to whether or not there will need to be a curtailment event (Demand Response event) that week. If the answer is no, you as a participant will hear nothing from Evergy's Business Demand Response Team.

If there is an event, you will be notified that Monday that there will be a curtailment event that week.

For example, you will get an email/text/phone call communicating the following:

- There will be a curtailment event this week Tuesday, Wednesday or Thursday (these days could vary).
- Please be prepared to execute your curtailment plan.

Then as the week goes on, you will be notified the morning of the event. For example via email/text/phone you will receive:

- There will be a curtailment event today from 3pm to 6pm.
- Please execute your curtailment plan throughout this time.
- Please reply/text/or press 1 to confirm your participation.

If we get a "no" or a no response at all, we will reach out to you to make sure you got the message, and that you can curtail as planned.

That day, you will then start your plan.

» Payment Participation

Evergy uses your building's recent electric usage and weather factors to forecast how much electric load you would use each hour of the day of a curtailment event. We then compare this forecast to your actual load to calculate how much you reduced. Participants that successfully reduce their enrolled load are paid for the achieved portion of the load they reduced.

One Year Agreement Performance Percentage	Your Payment
100% Performance = (\$28.00 x 100 kW enrolled x 100% achieved)	\$2,800
110% Performance = (\$28.00 x 100 kW enrolled x 110% achieved)	\$3,080
75% Performance = (\$28.00 x 100 kW enrolled x 75% achieved)	\$2,100

- *Payment is capped at 110% of kW enrolled*
- *Less than 40% performance receives no payment*

Multi-Year Agreement Bonus Performance Percentage	Your Payment
100% Performance = (\$30.00 x 100 kW enrolled x 100% achieved)	\$3,000
110% Performance = (\$30.00 x 100 kW enrolled x 110% achieved)	\$3,300
75% Performance = (\$30.00 x 100 kW enrolled x 75% achieved)	\$2,250

- *Payment is capped at 110% of kW enrolled*
- *Less than 40% performance receives no payment*
- *Must meet 90% performance to remain eligible for multi-year agreement bonus*
