Standard Incentives

Everygy offers a wide range of incentives designed to help our Kansas business customers achieve energy savings by reducing the upfront cost of installations. Our Standard Incentives provide savings for energy-efficient equipment upgrades on a one-for-one basis, making it quick and easy to save money and energy. For projects with an anticipated incentive amount of \$15,000 or less, simply apply after equipment purchase and installation to receive a fast incentive check. For projects expecting an incentive greater than \$15,000, pre-approval must be obtained before equipment purchase. Small business and non-profit organizations may be eligible for improved incentive rates. Discuss with your Efficiency Outreach Associate.
