Business Energy Savings Program

Standard Incentives

Earn incentives for installing energy-efficient equipment and facility upgrades.

Evergy offers a wide range of incentives designed to help our Missouri business customers achieve energy savings by reducing the upfront cost of installations. Not only do you save money when installing your upgrade, you save every day after as you reduce the amount of energy your company uses. The Business Energy Savings program offers commercial and industrial customers in the Missouri service territory many great ways to save when upgrading to energy-efficient equipment.

The Evergy Standard Incentives Program provides incentives for energy-efficient equipment upgrades on a one-for-one basis, making it quick and easy to save money and energy. Simply apply after equipment purchase and installation to receive a fast incentive check.

Don't see your upgrade on the Standard Incentives list? If it saves energy, chances are it will qualify for a custom incentive. Contact a business development representative, call (866) 847-5228 or email businessrebates@evergy.com for more information on all available incentives.
